## **EDUCATION**

• Nanjing University of Aeronautics and Astronautics (NUAA)

M.S. in Computer Science; (Advisor: Prof. Xiaoyang Tan)

Nanjing, China

Sept. 2018 - Apr. 2021

Email: chaowen@nuaa.edu.cn

Github: https://github.com/Kabibi

• Anhui University of Technology (AHUT)

B.S. in Network Engineering; (GPA: 89.2/100; Rank: 1<sup>st</sup>/89)

Anhui, China

 $Sept.\ 2014 - Jun.\ 2018$ 

• National Yunlin University of Science and Technology (YunTech)

Exchange student in Computer Science and Information Engineering;

Taiwan, China Feb. 2016 – Jul. 2016

#### Research Interests

- Multi-Agent Systems: (1) build multi-agent systems using deep reinforcement learning; (2) apply multi-agent reinforcement algorithms to complex environments such as StartCraft II.
- Reinforcement Learning: (1) design sample efficient reinforcement learning algorithms; (2) apply reinforcement learning to real-world problems like resource allocation and robotics.

#### Publications

 SMIX(λ): Enhancing Centralized Value Functions for Cooperative Multi-Agent Reinforcement Learning Chao Wen, Xinghu Yao, Yuhui Wang, Xiaoyang Tan.
 In: Proceedings of the 34th AAAI Conference on Artificial Intelligence (AAAI 2020), link

• Truly Proximal Policy Optimization
Yuhui Wang, Hao He, Chao Wen, Xiaoyang Tan.
Journal of Machine Learning Research (Under Review), link

# PATENTS

• An off-policy method based on λ-return for cooperative multi-agent reinforcement learning. Xiaoyang Tan, Chao Wen, Xinghu Yao. ID: 201911373178.X (in process)

# EXPERIENCE

• Nanjing University of Aeronautics and Astronautics

Graduate Student and Teaching Assistant

Nanjing, China Sept. 2018- Present

- Graduate Student Parnec Group:
  - 1. Design sample efficient RL algorithms & cooperative multi-agent reinforcement learning algorithms.
  - 2. Develop the python library pyrl for RL research.
- o Teaching Assistant The C Programming Language:
  - 1. This course had more than 100 students enrolled.
  - 2. Involved in creating assignment, exams and answering questions.
- o Project Leader Research Project on Cooperative Multi-Agent Reinforcement Learning:
  - 1. Based on centralized training, decentralized execution paradigm, design sample efficient MARL algorithms.
  - 2. This research project was funded by NUAA with 5,500 RMB.
  - 3. One papar of this project has been accepted by AAAI 2020.

• Synced

Beijing, China

Jun. 2018 - Aug. 2018

Algorithm Engineer Intern

# o Data Crawling and Analysis:

- 1. Data crawling, processing, and analysis using Python libraries like Beautiful Soup, Regex and lxml;
- 2. The data source came from a variety of websites such as Google, Wikipedia and AI Conference websites;
- 3. Data was analysed using machine learning algorithms including SVM and deep learning.
- SyncedLeg Project (code, article):

- 1. SyncedLeg is a customizable tool for mining influential keywords from large corpus.
- 2. Responsible for the algorithm design, implementation, code integration, and documentation.
- 3. This project was originated from a competition, in which our team won the  $1^{st}$  prize.

# • National Yunlin University of Science and Technology

Exchange Student

Taiwan, China Feb. 2016 - July. 2016

- Took in some specialized courses such as Operating Systems, Pattern Recognition, Algorithm Design and Analysis and Digital Logic Design;
- o Got the highest score in two courses: Algorithm Design and Analysis and Digital Logic Design;

## • Anhui University of Technology

Anhui, China

 $Undergraduate\ Student$   $S\epsilon$ 

Sept. 2014 - Jun. 2018

- Thesis A Study of Policy Gradient Methods Based on Deep Reinforcement Learning:
  - 1. Policy gradient sufers from the notorious variance issue. So this thesis investigated the performances of three methods for reducing the variance of policy gradient, namely baseline, advantage normalization and reward-to-go.
  - 2. This thesis won the Outstanding Bachelor's Thesis Award of AHUT.

#### Selected Projects

- pyrl: This project includes classical **reinforcement learning** implementations such as DQN, A2C, DDPG, and TD3, which tries to provide a standard platform for reinforcement learning research. (link)
- MARL: This projects aims to provide a tutorial for several multi-agent reinforcement learning algorithms, including IQL, VDN and QMIX. (link)
- Pass-Nuaa-Lab-Exam: This is a Python script used for automatically passing a compulsory lab examination in NUAA. This project makes use of Selenium and socket programming to crawling the data from the Internet and answering the questions automatically. (link)
- SyncedLeg: SyncedLeg is a customizable tool for mining influential keywords from large corpus. (link)

#### SKILLS

- English: CET-6: 553, IELTS (in preparation).
- **Programming**: Python, C/C++.
- Libraries: Pytorch(prefered), Tensorflow.
- OS: GNU/Linux (Ubuntu), Microsoft Windows.
- Other: Vim, Git, LATEX, SQL.

### AWARDS

• First-Class Academic Scholarship for Graduate Students (10,000 RMB)	NUAA, Dec. 2019
• Student Travel Scholarship	AAAI, Dec. 2019
• Outstanding graduate of Anhui Province (top 5%)	AHUT, Sept. 2018
$\bullet$ Outstanding Bachelor's Thesis Award of AHUT (top 2%)	AHUT, Sept. 2018
$\bullet$ The $1^{st}$ Prize in Synced Hack Weekend Competition (6,000 RMB)	Synced, Aug. 2018
• First-Class Scholarship (top 5%)	AHUT, Dec. 2017
$ullet$ The $3^{rd}$ Prize in the $7^{th}$ China National College Student E-Commerce Challenge	AHUT, Jun. 2017
• National Scholarship (top 1%, 8,000 RMB)	AHUT, Dec. 2016
• Special Scholarship (top 2%)	AHUT, Dec. 2016
• First-Class Scholarship (top 5%)	AHUT, Dec. 2015

### Social Work

• Member of International Department of the Graduate Student Union

NUAA, Sept. 2018 - Present

• Vice-Minister of Science and Technology Department of Student Union

AHUT, Sept. 2015 - Sept. 2016

• Volunteer for International Students

AHUT, Sept. 2015 - Dec. 2015

## Interests

- Sports: swimming, table tennis, badminton, running, hiking;
- Other: coding, reading, movie
